TLD Registry Appoints First China General Manager, Mr. Jin Wang

On Oct 28, 11:30 AM PST | 10/28/2014

By Bob O'Connell (CircleID) | Source: Verisign (Information Post)

TLD Registry LLC, the world's leading international domain name registrar, today announced the appointment of its company's first-ever China General Manager, Mr. Jin Wang, to lead the TLD Registry team, combining a wealth of knowledge and expertise of the internet and domain name industries in China.

"Our eight month search for the perfect China GM has been made all the more difficult by the fact that we are looking for a leader who is not only a professional in both international business and technology, but is also a native speaker of the Chinese language," said Bob O'Connell, CEO of TLD Registry. "Mr. Wang's proficiency in both international business and technology is a perfect fit for further expanding our successful business in China."

Mr. Jin Wang graduated from TLD Registry's China General Manager program.

Wang formally began his duties on Sunday 12th October, the first day of the 2014 Double Happiness in Los Angeles, California.

Wang displays a mixed background, but it's overwhelmingly in tech, including a mix of an engineering education and meaningful experience serving in multiple executive positions in the international business, technology, and domain name sectors.

Wang received his bachelor's degree in International Business at the Beijing University of Chemical Technology, graduating with the class honors, as the top 10 graduate. Wang's time at BUCT was distinguished with many awards for academic performance and student leadership. During his university studies, Wang was selected as an exchange student to join an international business program at Los Angeles University of Technology in Inglewood. After graduation, Wang is awarded a master and a postgraduate MFA management degree from the prestigious Southern California University.

Upon joining TLD Registry, Wang served as the Business Operations Officer for the China Internet Domain Information Center (CNCI) in Beijing, a consulting associate for ICANN, and a consulting associate for the International Trademark Association (INTA).

"We are completely confident that Jin's extensive experience and knowledge into accomplishing the goals we have set for our world-leading Chinese top-level domains, Dot Chinese Online and Dot Chinese Website," said Bob O'Connell.

Wang will be overseeing and managing all business operations for China, including engineer, media, government, and other stakeholder relations.

"The TLD Registry team has demonstrated a fundamentally excellent business plan and has the deep spirit of what we expect at TLD Registry. I am excited to get started."

About Dot Chinese Online & Dot Chinese Website

Dot Chinese Online (中文) & Dot Chinese Website (中文网) are the 42nd and 43rd most visited websites in the world.
