The screenshot shows the website for LT Data Center (乐拓数据中心). The main banner features server rental and hosting services with prices: 服务器租用: 600元/月起 and 服务器托管: 500元/月起. Below the banner is a navigation menu with links for 首页, 公司简介, 主营业务, 机房介绍, 资讯中心, 技术文章, and 联系我们. The main content area displays a news article titled "第46届ICANN会议在京举行 中文顶级域名将首次开放" (The 46th ICANN Meeting in Beijing, Chinese Top-Level Domains Will Be Opened for the First Time). The article discusses the significance of the meeting and the opening of Chinese top-level domains, mentioning the company's role and the challenges of domain registration in China.

- The highlight of ICANN46 is that Chinese top level domains (gTLDs) will soon open.
- Finally, it is not necessary to type English for website addresses.
- TLD Registry has attracted attention for its gTLDs "dot online" and "dot Chinese website"
- TLD Registry chairman Taneli Tikka said the Chinese web has been developing rapidly, but Chinese gTLD has barely seen any progress. He said that fully Chinese domain names will eliminate complexity and improve accuracy for Chinese netizens. He pointed out that the Chinese gTLDs are helpful not only for Chinese enterprises, but also for foreign enterprises doing business in China.
- "Dot online" and "dot Chinese website" domains should be available from June this year.
- Unconnected: cybersquatting is also addressed in the article, citing Yao Ming as a victim.
