- Finland is the most innovative country in the world. Finnish Ministry of Foreign Affairs organized Pure Finland events and invited Chinese media to visit innovative corporations in Finland.
- Finnish people are born to be innovative: The architectures and designs in this country are both famous around the world.
- TLD Registry represents a new kind of Finnish innovative entrepreneurship. TLD Registry applied two Chinese domain names, Dot Chinese Online and Dot Chinese Website. These two domain names brought the company huge profit. Major companies in China and around the world have already recognized the value of these domains and registered for their companies.
- Finnish government supports new start-ups: Finnish government provided start-ups with many entrepreneur fund. Once passing application, these start-up companies can get at least several hundred of Euros of government's entrepreneur fund.
