TLD Registry, the registry of Dot Chinese Online (.在线) and Dot Chinese Website (.中文网), has made further improvements to their New gTLD tool located at ChineseLandrush.com that helps non-Chinese speakers to understand and invest in Chinese domains.

At ChineseLandrush.com, visitors always find 500 hand-made domain name suggestions.

ChineseLandrush.com version 3.1 comes with a brand

new feature, as well as a bug fix.

The new feature allows domainers to submit your own lists of domain names (in English), and have them directly translated by ChineseLandrush.com China experts, in-house.

The bug fix has also cleared up unnecessary hassles. In the previous version, some ChineseLandrush name suggestions were registry-reserved, but now, with version 3.1, ChineseLandrush automatically checks against all registry-reserved names, and will not display matches.

You can watch a video with the 3.0 version changes [here](#) and the first 3 videos from ChineseLandrush.com are available [here](#).

Konstantinos studied Computer Engineering and Computer Science in London, UK, and lives in Athens, Greece. He works on domain name registration, management, UDRP consulting, website development and hosting. He has been online since 1006 and a domain investor since 2002.
